

Medical Grade EMR Keyboard

Totally Sealed Easy to Clean Quiet Operation

The Q3000 from Operator Interface Technology is a silicone rubber sealed keyboard that may be used in many environmentally hostile conditions. There are no openings around the keys for unwanted contaminants and the keyboard surface can easily be cleaned. The built-in “Clean Mode” can be initiated with a few keystrokes so the keyboard can be cleaned without unplugging.

Q3000 Benefits

- Rapid Data Entry
- Easily Cleaned
- Clean Mode
- Prevents Cross-Contamination
- Quiet Operation
- 2 Year Warranty

Conventional keyboards are great for single user office environments but alternatives should be considered for multi-use and more severe environments. **80% of infectious diseases are transferred by touch** so communal keyboards should be cleaned on a regular basis. The Q3000 quietly operates like a standard keyboard and is very easily cleaned.

Typical Installations

- EMR Carts
- Patient Room
